

Facade Clean

Properties

Alkaline and very efficient cleaning agent. Removes efficiently all kinds of dirt.

- Efficient cleaning of all kinds of dirt
- Can be applied by spraying gun
- Excellent for wood, brick walls and metal

Treatment

Mix as indicated.

Apply by low-pressure sprayer, paint brush or brush.

Irrigate very absorbent substrates before treatment. After soaking for 5-20 minutes, work the surface by brush, so that impurities are dissolved efficiently.

Then rinse with pure water until all soap residues have been removed.

Application

For cleaning of very dirty woodwork and masonry as well as metal sheets before painting.
