

Metal Pro Cleaner

Product properties

Effective, acidic cleaner for cleaning metal surfaces before painting. Dissolves rust, limescale, soap residue and metal oxide (white rust). Removes grease, dirt, grime and other impurities.

- **Cleaning of metal**
- **Dissolves rust**
- **Excellent for metal**

Product use

Metal surfaces before paint treatment.

Substrate

Must be clean, dry, solid and suitable for paint treatment.

Treatment

Remove loose dirt and rust with a steel brush, for example. Wash the surface with Metal Pro Cleaner diluted according to the instructions for use. Leave on for 5 minutes and rinse with clean water. Allow the surface to dry before applying paint.

Application

Dosage: Dirty metal: 0.3-0.6 parts to 10 parts water.
Very dirty and rusty metal: 0.6-1 part to 10 parts water.

Expected result

Clean surface ready for paint treatment.

Environmental information

Remove the cap before recycling.

Storage: Cool, frost free and tightly closed
